CINDY –
WE NEED A CASHIER'S CK
FOR THE AMOUNT BELOW,
P

5/9/88

Dear Paul,

Sorry to have bothered you when you're feeling so miserable. I hope you've got the spring back in your step by now.

Here is the list of the things we would like to order from Apple in addition to changing our Laserwriter order from the IINT to the IINTX. Sorry for the hassle, but the more I've read about the NTX and its processor and upgradeability, the more I think it will be the choice we can live with for years. Supposedly it's considerably more expensive to upgrade from the NT to NTX later, because so many of the parts on the board are duplicated and not transferable. We use a lot of downloadable fonts and memory-intensive graphics, and the NEC Silentwriter with its 3MB of RAM that we're currently renting hasn't failed to spit out a page yet (unlike my experience with the Laserwriter Plus). We'd also like to get a color monitor and the appropriate cards for it.

So here's the list. If Apple says OK on the order change, we can either send down a check for this amount or Cindy can advance it and add it to our equipment tab, whichever she prefers. And when you're talking to Apple, would you mind asking them when they expect to be shipping these items, as well as the 2MB RAM upgrade kits we already have on order?

Thanks so much, Paul. See you soon. —Bucky

Order #	Item	Price
M6215	Laserwriter IINTX w/Toner Cart+Letter Cassette (Replaces Laserwriter IINT already ordered)	$1000.00 (price difference)
